- 1. The barracks installation in Humanne (R 49/E 86) was about 500 meters west of the city, adjoined a large tractor pool to the northeast, and included one large 4-story building containing billets and three single-story buildings which presumably were magazines. A training ground was directly north of the installation.
- 2. Prior to November 1951, the tarracks installation was occupied by an infanty unit, which moved to an unidentified place. In late November 1951, the bifracks installation was occupied by a tank unit, which, residents believed, came from Fohemia. On 24 November 1951, source observed the unloading of armored vehicles at the railroad station. He counted a total of 40 tanks including 30 which, he believed, work T-34 tanks, and 10 tanks of a model larger than the T-34 tanks which had guess of an estimated size of 120 mm. All tanks traveled from the railroad station to the barracks installations, where source frequently saw them parked in a yard. Prior to August 1952, the tanks usually left the installations for tractices toward Vihorlad (R 49/E 95), but were also frequently seen in the environs of Humenne. The practices exclusively involved T-34 tanks. Source saw no tanks of the large model outside the barracks installation.

25X1A Comment. It is believed that the Tank SF Arty Regt of the 10th Inf Div is stationed at Humanne.

CLASSIFICATION CONTIDENSIL
